

Sashika Hansani

Intern Software Quality Assurance Engineer

Colombo, Sri Lanka | 0719738832 | sashikahansanii@gmail.com

LinkedIn | GitHub | Portfolio

PROFILE

Motivated third-year Computing and Information Systems undergraduate with a strong foundation in Software Quality Assurance and a passion for delivering high-quality software. Detail-oriented and analytical, with strong problem-solving skills and a commitment to identifying defects, ensuring software reliability, and enhancing user experience. Eager to apply my knowledge and contribute to maintaining software quality through effective testing and continuous improvement.

EDUCATION

B.Sc. (Hons) in Computing and Information Systems — 2024 – Present
Faculty of Computing, Sabaragamuwa University of Sri Lanka — Belihuloya, Sri Lanka

G.C.E. Advanced Level (Physical Science Stream) — 2013 – 2022
Badulla Central College — Badulla, Sri Lanka

TECHNICAL SKILLS

Software Testing & QA: Manual Testing | Test Case Design | Test Scenario Design | Functional Testing | Regression Testing | Smoke Testing | Bug Reporting | Defect Tracking | SDLC | STLC

Test Automation Tools & Frameworks: Playwright | Selenium WebDriver | TestNG

API Testing: Postman | REST API Testing

Programming Languages: Java | JavaScript | TypeScript | Python | PHP

Frontend Technologies: HTML | CSS | React.js | Next.js | Tailwind CSS

Backend Technologies: Node.js | Express.js | FastAPI | Spring Boot

Databases: MySQL | PostgreSQL | MongoDB | Firebase Firestore

Cloud & DevOps: AWS | Docker | GitHub Actions | Firebase | Linux (Ubuntu)

Version Control: Git | GitHub

Project Management & Collaboration: Jira | Trello

AI & LLM Frameworks: LangChain | CrewAI

UI/UX Design: Figma

PROJECTS

SmartMath Web Application Test Automation | ***GitHub*** — 09/2026
Technologies: Selenium WebDriver | Java | TestNG | Maven | ChromeDriver

- Designed and implemented automated test cases for the SmartMath web application using Selenium WebDriver and Java.
- Developed and maintained reusable test scripts covering login functionality, form validation, and essential user workflows by applying the Page Object Model (POM) design pattern.
- Performed functional and regression testing using TestNG to identify defects, verify application functionality, and ensure consistent application behaviour.
- Configured and managed project dependencies, test execution, and build processes using Maven to maintain an organized and repeatable automation framework.

Customer Inquiry Management System Test Automation | ***GitHub*** — 11/2026 – Present
Technologies: Playwright | TypeScript | Node.js | Chrome

- Developing an end-to-end test automation suite for a web-based Customer Inquiry Management System using Playwright and TypeScript.
- Applying the Page Object Model (POM) design pattern to organize reusable and maintainable test scripts.
- Automating key application workflows, including staff authentication, inquiry submission, search, and status management.

Crystal Clear Beauty | ***GitHub*** 10/2026

Technologies: React.js | Tailwind CSS | Node.js | Express.js | FastAPI | MongoDB | Supabase | RAG | Docker | Postman | Manual Testing | Test Case Design | Functional Testing | Regression Testing | REST API Testing

- Developed and Performed functional testing of an AI-powered cosmetics e-commerce application, covering authentication, product management, order processing, and AI-powered product recommendations.
- Designed and executed 44 test cases and test scenarios covering user authentication, shopping cart, checkout workflows, and RESTful API validation using Postman.
- Conducted regression testing after application updates and Dockerized deployments to identify defects and ensure application stability.

TrackoBus | ***GitHub*** 03/2026 – 08/2026

Technologies: React Native | Spring Boot | WebSockets | PostgreSQL | PostGIS | Postman | Jira | Docker

- Developed TrackoBus, a community-powered mobile application that provides real-time bus tracking and ETA estimation using passenger-generated location data, eliminating the need for expensive GPS hardware.
- Executed manual functional, regression, and smoke tests across mobile interfaces, and designed test scenarios to validate real-time location sharing and ETA calculations.
- Validated RESTful APIs and WebSockets using Postman, and tracked and reported defects using Jira.

BizPulse | ***GitHub*** 10/2026 – Present

Technologies: Python | CrewAI | Google Gemini API | GitHub Actions | SMTP

- Developed a multi-agent AI-powered financial intelligence platform that aggregates real-time market data and business news, analyzes market impacts, and generates executive financial briefings using Google Gemini API and CrewAI agents.
- Configured GitHub Actions CI/CD workflows to automate Python environment setup, dependency installation, and pipeline execution.
- Automated report generation and email delivery via SMTP as part of the application workflow.

CERTIFICATES

Introduction to Software Quality Assurance
University of Moratuwa

Introduction to Selenium
Simplilearn

Agile Project Management with Jira Cloud: 1 & 2
LinkedIn Learning

Project Management Foundations
LinkedIn Learning

Introduction to Cloud Computing on AWS for Beginners [2026]
Udemy

Docker Training Course for the Absolute Beginner
KodeKloud

Learning Linux Basics Course & Labs
KodeKloud

Fundamentals of DevOps Tools
Simplilearn

SOFT SKILLS

- Analytical Thinking
- Problem Solving
- Attention to Detail
- Teamwork
- Communication
- Adaptability
- Time Management
- Willingness to Learn

AWARDS

SHECODERess V6.0 - *UWU IEEE Student branch* – 1st Runners-Up

EXTRA CURRICULAR ACTIVITIES

Marketing Team Member
AURELIA 2.0 (IEEE WIE Day 2026) by IEEE WIE Student Branch Affinity Group, SUSL

Secretary
PathForward 3.0 by IEEE Student WIE Branch Affinity Group, SUSL
